Event Purpose:

Kansas Community Health Worker (CHW) Symposium will:

- Provide a venue where all stakeholders can better understand the progress and barriers associated with CHWs specific to Kansas.
- Offer an opportunity for networking among the CHWs and their organizations across the state.
- Focus on designing CHW infrastructure and systems rather than skill building.

The long-term goal of the CHW Symposium is to help reduce health disparities and increase access to care through CHWs in Kansas.

Symposium is FREE to all participants

Finalized event agenda will be available early April 2016.
