Module 3
Practice Guide for Community Health Assessment

This Practice Guide is designed to help you apply what you have learned to your own community health assessment and improvement efforts. Although optional, we consider this an important companion to the Community Tool Box Online Curriculum.

[From Lesson 1.3: Defining the Community and Geographic Area for the Assessment]

    1.1.1. Identify specific geographic areas of responsibility (distinct and overlapping) for key stakeholders.

Your Plan:

    1.1.2. Identify available/potential data sources for the community health assessment and the geographic areas they represent.

Your Plan:

    1.1.3. Recommend the scope or geographic area that will define "community" health assessment.

Your Plan:

    1.1.4. What would key elements of a community description for your community include?

Your Plan:

[From Lesson 1.6: Identifying Community Assets and Resources]

    1.2.1.   Determine the intended uses of identified assets/resources in your situation.

Your Plan:

    1.2.2.   List categories of community assets of groups/institutions relevant to your community health initiative.

Your Plan:

    1.2.3.   Identify and use sources to gather information about community assets.

Your Plan:
